# Our Phase Indicator KEW8035 provides our customers with 'SAFETY' !

Safety awareness on electrical testing has been growing day by day. KEW 8035's new technology permits safe testing, without the need of direct contact between probes and live wires. Please see following the key features & benefits of KEW8035.

**Magnet attachment**

User-Friendly !

**Can clip insulated cables**

**For cables from  $\phi 2.4$  to 30mm**

Safety & Flexibility !

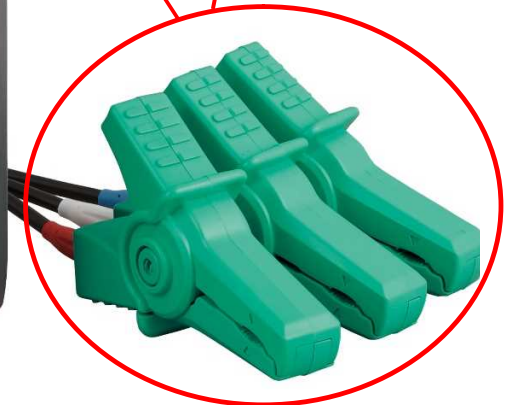

Clear Indication !

**Green arrow LEDs "rotate" in clockwise.**

**Red arrow LEDs "rotate" in counter clockwise.**

## ● Key Benefits

### (1) Safety & Flexibility

The insulated crocodile clips enable you to;

- ✓ Make safe testing without direct contact to metal parts,
- ✓ Clip insulated cables from  $\phi 2.4$  to 30mm,
- ✓ Make testing keeping away from crowded space with many cables.

### (2) User-Friendly

By attaching the instrument on metal panel via the rear magnet, you can make hands-free operation.

### (3) Clear Indication

The indication with arrow LEDs enables you to take a clear photo, which will be useful as a proof of your field operation.
