

Industrial Buzzers Electromechanical

- Rugged construction
- Wide voltage range
- These units are rated for 15 minutes on/5 minutes off
- Loud low frequency sound
- Dustproof and Weatherproof

VS-111EMS

Model VS-111EMS is an electrical/mechanical buzzer ideal for applications requiring a low frequency and penetrating audible signal. VS-111EMS is a single stage alarm that produces a unique tone caused by a vibrating diaphragm. They can also be pulsed by a control panel/PLC to produce an intermittent signal.

Model VS-111EMS is a weatherproof unit suitable for light marine applications and is encased in a brass enclosure making it suitable for corrosive environments.
