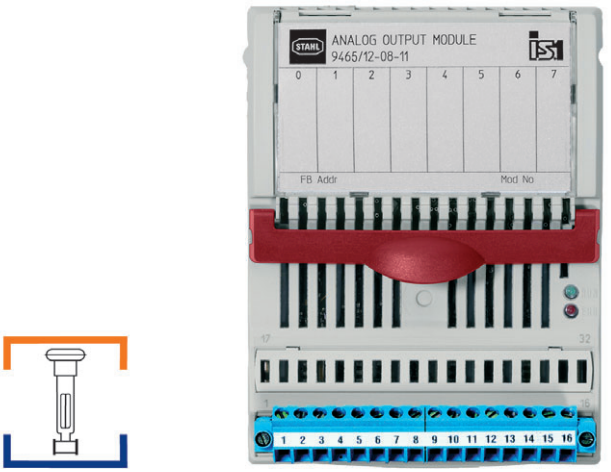
Analog Output Module Ex i / I.S. Outputs, 8 Channels for Zone 1

Series 9465



02008E00

- > 8 channels for controlling I/P converters and control valves with 0/4 ... 20 mA
- > Intrinsically safe outputs Ex ia IIC
- > Galvanic separation between outputs and system
- > Open-circuit and short-circuit monitoring for each field circuit
- > Module can be replaced in operation (hot swap)
- > New version: Type 9468/32

The Analog Output Module is used for the connection of up to 8 I/P converters, positioners or control valves with 0 ... 20 mA or 4 ... 20 mA signals. All outputs are intrinsically safe and short-circuit proof.
Each output is individually monitored for open and short circuits.
The interface of the Analog Output Module with the internal data bus of the BusRail is designed with redundancy.
For operation of HART field devices see Series 9466.
