MAGNETSCHULTZ

Your Specialists for electromagnetic Actuators and Sensors

Electromagnetically Actuated Shotbolt Lock Units

Product group

GHUZ032

- According to DIN VDE 0580
- Almost linear magnetic force vs. stroke characteristic
- Solidly executed shotbolt
- Pull type (de-energized locked) or push type (de-energized unlocked)
- Installed return spring
- Maintenance free bearings with high service life
- Insulation materials of the excitation winding correspond to thermal class F
- Electrical connection and protection class when properly installed:
 - Plug connection by spade connectors according to DIN 46247
 Protection class according to DIN VDE 0470-1/ DIN EN 60529 – IP 00
 - Plug connection via plug connector type Z KC according to DIN EN 175 301-803
 Cable gland (2 x 180-degree rotatable)
 Protection class according to DIN VDE 0470-1/DIN EN 60529 IP 40
- Mounting via central thread
- Please contact us for application related solutions
- Application examples (according to health and safety at work regulations and according to accident preventing regulations): Interlocking of protectors of machines of all sorts

Fig. 2: Force vs. stroke characteristic

Technical data

G HU Z 032		
Operating mode		S1 (100%)
Stroke s	(mm)	6
Rated work A _N	(Ncm)	2,85
Rated power P ₂₀	(W)	7,2
Reference temperature i ₁₁₁	(°C)	35
Operating frequency S _h	(1/h)	30000
Actuation time t ₁	(ms)	70
Fall time t ₂	(ms)	40
Armature weight m _A	(kg)	0,03
Solenoid weight m _M	(kg)	ca. 0,25
Maximum lateral load: Sholtbolt in normal position in motion	(N) (N)	600 4

Rated voltage == 24 V, the exciter coil can be adjusted to a rated voltage of == 250 V maximum on request.

The magnetic force values indicated in the tables refer to 90 % of the rated voltage, (UN = \Longrightarrow 24 V, for other voltages deviations of the magnetic force may occur) and to the normal operating temperature.

Due to natural dispersion, the force values and the force values of the spring may deviate by 10 % from the values indicated in the tables.

The normal operating temperature is based on:

- a) mounting on badly conductive base
- b) rated voltage == 24 V
- c) operating mode S1 (100 %)
- d) reference temperature 35° C

The stroke movement effected by the electromagnetic force can be pulling or pushing depending on the design.

The reset in the stroke start position is effected by the built-in spring. Both operations, "de-energized locked" and "de-energized unlocked" are possible. However the operation "de-energized locked" is preferable.

Reliable flexible fastening is guaranteed through the central thread. Design with signal switch on request.

Fig. 3: Magnetic force vs. stroke characteristic and return spring

For connection via plug connector Z KC X or Z KC G, please take into consideration the max. continuous current of the plug.

Information and remarks concerning European directives can be taken from the correspondent information sheet which is available under *Produktinfo.Magnet-Schultz.com*.

Note on the RoHS Directive

According to our current state of knowledge the devices pictured in this document do not contain any substances in concentration values or applications for which putting into circulation with products manufactured from them is prohibited in accordance to RoHS.

Please make sure that the described devices are suitable for your application. Supplementary information concerning its proper installation can be taken also from the -Technical Explanation, the effective DIN VDE0580 as well as the relevant specifications.

This part list is a document for technically qualified personnel.

The present publication is for informational purposes only and shall not be construed as mandatory illustration of the products unless otherwise confirmed expressively.

Dimensions table

Type code

Order example

Type G HU Z 032 M30 A01

(pull type)

Voltage == 24 V DC
Operating mode S1 (100 %)

Specials designs

Please do not hesitate to ask us for application-oriented problem solutions. In order to find rapidly a reliable solution we need complete details about your application conditions. The details should be specified as precisely as possible in accordance with the relevant $^{\bullet}$ -Technical Explanations.

If necessary, please request the support of our corresponding technical office.
