

Joysticks

JHT

- Miniature joystick
- Compact design excellent for armrest and panel mounting
- Available up to IP68S sealed
- Single axis or various omni-directional options
- Pushbutton switch available
- 5,000,000 cycles (joystick)

*JHT with pushbutton shown

JHT Z-Axis

- Miniature joystick with z-axis
- 60° rotational movement of the knob at the top of the joystick
- Z-Axis options include detent, friction hold or spring return to center
- Available up to IP68S sealed
- Optional pushbutton switch(es) available
- Various gating options available
- 1,000,000 cycles (joystick)

JHM

- Medium joystick
- Shorter behind panel depth
- Designed for armrest & panel mounting
- Electronics sealed up to IP68S
- CANopen, CAN J1939, USB, PWM, serial and analog output configurations available
- Variety of grip and switch options
- Redundant outputs available
- Up to 10,000,000 cycles in all directions

*JHM with G3-E grip shown

JHS-F

- Single axis, friction hold joystick
- 500,000 cycles

JHS-RC

- Single axis, smooth spring return to center joystick
- 4,000,000 cycles

SHARED ATTRIBUTES

- Rugged compact design
- Available up to IP68S sealed
- Redundant output available

JHL

- Heavy duty joystick with integrated connector
- Available up to IP68S sealed
- CANopen, CAN J1939, USB, serial and analog output configurations available
- Single or dual axis
- Numerous handle/grip options
- Various gating configurations
- Excellent RFI/EMI immunity
- 6,000,000 cycles

JH

- Large, heavy duty joystick
- Available up to IP68S sealed
- Adapts to a wide variety of shaft styles
- 300 lbs. static load strength at grip reference point (GRP)
- CANopen, CAN J1939, USB, serial and analog output configurations available
- EMI/RFI immunity up to 100V/M
- Single, dual and Z-axis available
- Variety of grip and switch options
- Redundant outputs available
- Up to 15,000,000 cycles

*JH Joystick shown with small universal grip incorporating Hall effect pushbutton switches (HP7's) and a Hall effect thumbwheel switch (HTW).

Finger Joysticks

HTL

- Two-way, four-way or omnidirectional finger joystick
- Designed for grip, armrest & panel mounting
- Programmable sensors with built-in temperature compensation
- Available up to IP68S sealed
- Variety of button styles
- 1,000,000 cycles
- * Castle style button shown

HTLT

- One/two axis gated or 360° finger joystick
- Pushbutton option
- Up to IP68S sealed
- 7 button styles
- Multiple output options including redundant
- Threaded case
- 3,000,000 cycles

Pushbuttons

HP7

- Momentary action
- IP64 or IP68S sealed
- Mechanical detent available for tactile feedback
- 9 button color choices
- For applications requiring high actuation rates
- 10,000,000 cycles (without detent option)

HP7C

- Lower cost momentary action
- IP68S sealed
- Thermoplastic case
- Nylon button
- 9 button color choices
- 10,000,000 cycles

HPL

- Linear output
- Choice of termination styles
- IP65 or IP68S sealed options
- Rocker version available
- Front or behind panel mounting
- 1,000,000 cycles

Thumbwheels

SHARED ATTRIBUTES

- Electronics sealed to IP68S
- Knurled or paddle wheel style actuator options
- Wire or pinned termination options
- Variety of bezel and thumbwheel colors
- Redundant output options

HTW

- Proportional output
- Spring return to center single axis actuator
- 3,000,000 cycles

HTWE

- Proportional output
- Spring return to end single axis actuator
- 8 output options
- 1,000,000 cycles

HTWF

- Friction hold
- Maintained position single axis actuator
- 250,000 cycles

HTWM

- Mini proportional output
- Spring return to center single axis actuator
- Short behind panel depth
- 3,000,000 cycles

HTWME

- Mini proportional output
- Return to end single axis actuator
- Short behind panel depth
- 6 output options
- Easy snap-in panel mounting
- 1,000,000 cycles

HTWS

- Subminiature proportional output
- Spring return to center single axis actuator
- Smaller version of HTWM
- Seal Boot option
- 8 output options
- 3,000,000 cycles

Miscellaneous

HFNR

- Forward/Neutral/Reverse rocker
- 2V to 24V LED backlighting options
- Electronics sealed to IP68S
- Easy snap-in panel mounting
- Variety of colors
- 3,000,000 cycles

HJFC

- Unidirectional or Bidirectional foot pedal
- Heavy gauge, corrosion resistant metal
- Electronics sealed to IP68S
- Pedal pivot point sealed against large debris
- Programmable pretravel and overtravel
- Programmable minimum and maximum output
- Reverse polarity protection available
- CANopen, CAN J1939, USB, serial and analog output configurations available
- 9,000,000 cycles

HPW

- Single axis paddle
- Self-centering actuator
- Electronics watertight per IP68S
- For grip, armrest and panel mounting
- 8 output options
- Lever or paddle style actuator options
- 5,000,000 cycles (without detent option)

Rocker (U2-452)

- Proportional output rocker
- For use in panels and in grips
- Electronics sealed to IP68S
- Black button and housing
- 2,500,000 cycles
